DROPFONT		Drop Front tailgates on tandems	55		

# Cattle & Sheep Crates

## Reasons why you should purchase one of our stock crates

- Frame Constructed from 3.2mm Thick, 1" Diameter pipe.
- Designed to avoid damage to stock.
- Top row of V-Panel has top edge folded.
- Undercoated and top coated as standard.

## Highly Recommended options

- Divider has a heavy duty quick action slam catch.
- Divider can be located in two positions 1. The forward position, when not in use it can be fixed to the side of the crate, making it easy to carry without getting in the way. 2. In the Rear position the divider meets up with the open door making it easy to close after loading cattle or sheep.
- Removable Back - Save yourself the hassle of removing the crate every time you want to carry something more than 3 foot wide
- Drop Down Ramp - Perfect for unloading your stock in the paddock or a handy addition when you are caught without a race.
